LOWBOY FURNACE SERIES

HIGH EFFICIENCY ENERGY STAR®

Eclipse
HIGH EFFICIENCY OIL-FIRED LOWBOY FURNACE

Now available with:

- Classic/Classic Air options
- EVO options
- MAX options

Whether you're building a new home or replacing your existing furnace, our high-efficiency ENERGY STAR® qualified LOWBOY series units fits the bill. Their compact size lets them fit where others won't, even accommodating today's larger HI-SEER A-Coils.

The **Contour** is ideal for retrofits or new installations in today's larger homes, while the **Eclipse** is a perfect fit for today's smaller, energy efficient homes or electric conversions.

The **EVO** series incorporates Kerr's **EVO** control system for steady, even comfort. Our new **EVO** series offers cutting edge fan motor control compared to conventional furnace technology. The **EVO**'s TRUE air modulation provides improved heating, cooling and dehumidification for a comfortable, healthy home.

The MAX series features all the benefits the EVO series has to offer while integrating Kerr ECM technology . ECM technology provides the homeowner with a healthy and comfortable home while giving utility cost savings on heating and cooling bills.

Kerr stands behind every product it sells and carries one of the best warranties in the business.

Added Savings with

A net utility bill savings of up to *240/yr can be realized when using constant air circulation. Your actual savings will depend on the efficiency of the equipment being replaced, weather in your area, kWh pricing in your region, preferences for indoor temperature and energy efficiency of your home.

* based on .08 cent/kWh and conventional motor usage = approximately 400 watts and motor usage of 75 watts.
